1200 × 800 Hygienic Plastic Pallet – version 3

For many years now, the IPS 1200 × 800 hygienic plastic pallet has struck the perfect balance between mechanical performance and hygiene requirements. Manufactured exclusively from food-grade HDPE – no metal reinforcements – this pallet has become the standard in many industries across Europe. This fully closed pallet has no cavities, making it impossible for dirt to accumulate. Very easy to clean.

H1-GD version for the transport and storage of E2 crates.

Special angle permitting easy stretch wrapping.

Fully closed pallet with no cavities.

Also available without skids.

Technical data

Dimensions*

length	1.200 mm
width	800 mm
height	155 mm
window opening	95 mm
full ground clearance	100 mm

*dimensions in accordance with ISO, AFNOR, DIN, CEN

Load capacity*

static	4.800 kg
dynamic	1.200 kg
in rack**	1.000 kg

*loading capacities can vary according to the type of load

**homogeniously distributed load

Weight 18 kg (+/–2 %)

Temperature range

in use	-25°C up to +40°C
cleaning	up to +100°C

Characteristics

- standard colours: white – grey – cream
