Services

Our company concept:

The common intention – serve our customers with ideal services

Our target – satisfied customers

Our difference – a competent team

Our aspiration – a safe company, today and for the future

Teleservice

- hotline
- remote diagnosis
- support

Spare Parts Service

- original spare parts
- spare parts sets
- wear parts sets

Inspection/Maintenance

- service check
- service contracts
- technical advice

Modification/Reconditioning

- updating
- production optimization
- production supervision

Customer satisfaction by firsthand knowledge ...

Not only wood ...

Our competence in processing and feeding technologies applies to every material from all fields.

For instance for the building material industry and chemical industry, there are crosscut saws and knives, cooling systems (cooling towers, cooling tracks etc.), crosswise and lengthwise processing as well as profiling units after the continuous manufacturing processes of insulation materials.

The tire industry also uses the know-how from the feeding and stacking technologies incl. automatic buffers for treads for handling devices for tires of all kind.

... Development and construction of the perfect solution.

Visions

Precise interaction of all systems ...

Visions, solutions, competence, faith.

We are having visions which we want to realize together with you.

For more than 75 years we develop technical solutions „made in Germany“.

With the competence of our team we realize customized machines at the highest stage. With our high innovation, the active after sales service and our worldwide presence we prove your trust in us every day.

Our ambitions are obvious:

We want to keep on growing with you and aspire to the leadership in performance with regard to quality and the proximity to you, our customers.

Innovative products with tradition ...
