

Griss Inox. Automatic bread-sticker machine.

From Minipan experience is born a new bread-sticker machine's generation, the Griss Inox range, renewed because more reliable, faster and more versatile as it has ever been.

Griss Inox. For a simple and reliable production.

THE MATERIALS

Along with the really high quality components we have chosen only the most valuable materials to build the Minigriss of the future: stainless steel carpentry (AISI 304) and anodised aluminium sides. These materials grant a better resistance of the machines to the wear and tear of time, but also a bigger respect of the hygienic rules.

A STILL WIDER RANGE

Standard version: all the width measures of trays intermediate between 400 and 600 mm.
Griss inox made to measures: on request Minipan is able to realise the Griss models that are mostly close to the user exigencies, with a width that can vary from 600 up to 1600 mm. Industrial Griss Inox: moreover the Griss machines can be supplied in special industrial models for lodging on roller ramp for tunnel ovens and are predisposed, in each version, for continuous feeding systems.

	STANDARD GRISS (mod. from 400 up to 600)
Width of the machine	mm 940
Total length	mm 3.750
Height	mm 1.530
Weight	Kg. 560
Installed power	kW. 1,5
Electrical requirements	220/400 V., 50/60 Hz., three-phase
Whole construction	Stainless steel (AISI 304)
Electric switchboard	Protection IP 65
PLC Keyboard operator	Protection IP 65 on the front sid
Electronic control	PLC
Productivity	From 3 to 12 trays/min.
