

Abrasive Regulator

Highlights

1 Compact Design

The lightweight and compact design allows the unit to be positioned close to the waterjet cutting head.

2 Exclusive Adjustment

The adjustment dial offers a broad range of settings to ensure the precise amount of abrasive is being delivered.

3 Rapid Response

The metering system provides rapid response to ensure abrasive is delivered at the right moment, guaranteeing a consistent, smooth cut.

4 Water Resistant

Innovative new design keeps abrasive dry, improving uptime.

5 Monitoring Performance

Clear tube allows easy monitoring of waterjet cutting performance. Abrasive flow chart provides easy guidelines for operators.

6 No Tools Required

Easy to use thumb nuts make service much more convenient.

7 Built in Back Flow Diverter

Back flow diverter makes it simple and faster to remove plugs in the abrasive feed line.
